Misleading Graphs

Data can be displayed on graphs in ways that are misleading.

Use the graphs above to answer Exercises 1-6.

- 1. Which graph might be used to convince someone that the price of pizza has risen too quickly over the years?
- 2. Which graph might be used to convince someone that pizza makers should raise their prices?
- **3.** Name 2 ways in which the pizza graphs differ.
- 4. Which graph would Car Company X use to show that its cars last longer than the competition?
- 5. Which graph of cars still on the road after 10 years would Car Company Z prefer?
- **6.** Name 2 ways in which graphs C and D differ.
